

# The International All-day School in Berlin Mitte

## Mission Statement

BMS, an international school in Berlin-Mitte, provides students aged 3 to 18 with an international education in an academically challenging school program.

Our goal is to promote love of learning and achievement in order to ensure that children become successful lifelong learners. The development of individual talents and the intellectual, social and emotional development of our students are integral components of the school concept. In partnership with parents, a dedicated faculty helps children to become motivated, critical and creative adults with effective communication skills who see the global world as a community of which they are respectful, tolerant and responsible members.

The Berlin Metropolitan School has a preschool, a primary school, a middle secondary school and a (future) secondary school. The school curriculum draws upon the Primary Years Program (IBO), the International General Certificate of Secondary Education (Cambridge University) and the Diploma Program (IBO). The school program culminates in the IB diploma (IBO).
